

About custom:

you need to get 2 permits. One from CAAI and the second from ministry of communication 5.8 GHZ frequency is not allowed in Israel, you can use only 2.4 GHZ.

The forms are in Hebrew so you will need to get help to fill them up. As you will see you need to get in touch with [the Israeli club for model airplanes](#) and they can help you

The CAAI import request is at the following [link](#)

Pay attention that you will be asked to attach a declaration about you are using the drone only for pleasure and not commercial. You will find it [here](#)

.After you print it and sign it - scan it so you can attach it when you will be asked to in the online form

The Explanatory remarks (also in Hebrew) in the following [link](#)

For the permit of ministry of communication you need to get in touch with them. If you have difficulty with that, get help from the Israeli club for model airplanes.
